LOST COUNT

Old MacDonald had a farm, but he didn't have a good memory. He could never remember how many animals he had. After a lot of work he was able to count his cows, sheep, and rabbits, but he could not remember how many roosters and pigs he had. Between his roosters and pigs, he counted 16 heads and 56 feet. Help Old McDonald figure out how many roosters and pigs he has on his farm.

You can complete this on a blank piece of paper!
